Steamboat Springs Water Utility Customer

Service Address: Any address you maintain in the City of Steamboat Water District

Re: ****Fall 2024 Mandatory Early Irrigation Shut offs****

Dear City of Steamboat Springs Water Utility Customer,

The Fish Creek Water Treatment Plant will be shutdown beginning on September 16, 2024 through December 6, 2024 to complete necessary improvements. With our primary source of water supply offline, we will require all irrigation systems within the community to be turned off no later than September 15th, 2024 with very limited exceptions

Our Utility Technicians will commence turning OFF curb stops/water service for irrigation during the week of September 9, 2024, continuing through Friday, September 13. We will not be scheduling appointments and can not guarantee a specific day when your curb stop/water service will be turned off.

Remember "Every Water Drop Counts" so please do your part to help conserve water during the Fish Creek Water Treatment Plant shutdown. If you have any questions please contact Michelle Carr, via email at mcarr@steamboatsprings.net

Thank you,

City of Steamboat Springs Water & Sewer District
